

CHAPTER FIVE

Project Human Resource Management

Human Resource Management

What is Project Human Resource Management?

- Project human resource management is a subset of project management that includes the processes required to make **the most effective use of the people** involved within a project.
- Processes include
 - 1) Organizational planning
 - 2) Staff acquisition
 - 3) Team development

Keys to Managing People

- Important areas related to project human resource management include
 - Motivation
 - Influence and Power
 - Effectiveness

Motivation

- **Abraham Maslow** developed a hierarchy of needs to illustrate his theory that people's behaviors are guided by a sequence of needs
- Maslow argued that human beings possess unique qualities that enable them to make independent choices, thus giving them control of their destiny

Maslow's Hierarchy of Needs

Herzberg's Motivational and Hygiene Factors

- Frederick Herzberg wrote several famous books and articles about worker motivation. He distinguished between

- **Motivational factors:**

achievement, recognition, the work itself, responsibility, advancement, and growth, which produce job satisfaction

Hygiene factors:

- cause dissatisfaction if not present, but do not motivate workers to do more. Examples include larger salaries, more supervision, and a more attractive work environment

McGregor's Theory X and Y

- Douglas McGregor popularized the human relations approach to management in the 1960s
- **Theory X:** assumes workers dislike and avoid work, so managers must use force, threats and various control schemes to get workers to meet objectives
- **Theory Y:** assumes individuals consider work as natural as play or rest and enjoy the satisfaction of esteem and self-actualization needs
- **Theory Z:** introduced in 1981 by William Ouchi and is based on the Japanese approach to motivating workers, underlining trust, quality, collective decision making, and cultural values

THAMHAIN AND WILEMON'S WAYS TO HAVE INFLUENCE ON PROJECTS

- 1. Authority:** the legitimate hierarchical right to issue orders
- 2. Assignment:** the project manager's perceived ability to influence a worker's later work assignments
- 3. Budget:** the project manager's perceived ability to authorize others' use of discretionary funds
- 4. Promotion:** the ability to improve a worker's position
- 5. Money:** the ability to increase a worker's pay and benefits
- 6. Penalty:** the project manager's ability to cause punishment
- 7. Work challenge:** the ability to assign work that exploits on a worker's enjoyment of doing a particular task
- 8. Expertise:** the project manager's perceived special knowledge that others deem important
- 9. Friendship:** the ability to establish friendly personal relationships between the project manager and others

Ways to Influence that Help and Hurt Projects

- Projects are more likely to succeed when project managers influence with
 - **expertise**
 - **work challenge**
- Projects are more likely to fail when project managers rely too heavily on
 - **authority**
 - **money**
 - **penalty**

Power

- Power is the potential ability to influence behavior to get people to do things they would not otherwise do
- Types of power include:
 - **Coercive**
 - The ability of a manager to force an employee to follow an order by threatening the employee with punishment if the employee does not comply with the order
 - **Legitimate**
 - It is based on the reality that a person holds a particular position in an organization. It's also based on the perception of an employee that someone holding that position has authority to exercise control over her.

- **Expert**

- A power based upon employees' perception that a manager or some other member of an organization has a **high level of knowledge or a specialized set of skills** that other employees or members of the organization do not possess

- **Reward**

- Power that arises from the ability of a person to **influence the allocation of incentives** in an organization. These incentives include salary increments, positive appraisals and promotions.

- **Referent**

- It arises from interpersonal relationships that a person cultivates with other people in the organization. People possess reference power when others **respect** and like them. Referent power arises from **charisma**, as the charismatic person influences others via the **admiration, respect and trust** others have for her.

Improving Effectiveness - Covey's 7 Habits

- Project managers can apply Covey's 7 habits to improve effectiveness on projects

- 1) **Be proactive**-Take responsibility for your actions and choices (don't blame others).
- 2) **Begin with the end in mind**- Set clear goals and have a vision of what you want to achieve.
- 3) **Put first things first**- Prioritize important tasks before less important ones (time management).
- 4) **Think win/win**-Aim for solutions where everyone benefits, not just one side.
- 5) **Seek first to understand, then to be understood** - Listen carefully to others before expressing your own ideas.
- 6) **Synergize**- Work together as a team to achieve better results than working alone
- 7) **Sharpen the saw**- Continuously improve yourself (physically, mentally, socially, spiritually).

Empathic Listening and Rapport

- Good project managers are empathic listeners; they **listen with the intent to understand**
- Before you can communicate with others, you have to have **empathy**
- Mirroring is a technique to help establish rapport
- Software professionals often need to develop **empathic listening** and other people skills to improve relationships with users and other stakeholders

Organizational Planning

- Organizational planning involves identifying, documenting and assigning project roles, responsibilities and reporting relationships
- Outputs and processes include
 - project organizational charts
 - work definition and assignment process
 - responsibility assignment matrixes
 - resource histograms

STAFF ACQUISITION

- **Staffing plans** and **good hiring procedures** are important in staff acquisition, as are **incentives** for recruiting and retention
- Some companies give their employees one dollar for every hour a new person they helped
- Some organizations allow people to work from home as an incentive
- Research shows that **people leave their jobs** because they don't make a difference, don't get proper recognition, aren't learning anything new, don't like their coworkers, and want to earn more money

Resource Loading and Leveling

- Resource loading refers to the amount of individual resources an existing project schedule **requires** during specific time periods
- **Over-allocation** means more resources than are available are assigned to perform work at a given time

Resource Leveling

- Resource leveling is a technique for resolving resource conflicts by delaying tasks
- The main purpose of resource leveling is to create a smoother distribution of resource usage and reduce over-allocation

Team Development

- It takes teamwork to successfully complete most projects
- Training can help people understand themselves, each other, and how to work better in teams
- Team building activities include
 - physical challenges
 - psychological preference indicator tools

MEYERS-BRIGGS TYPE INDICATOR (MBTI)

- MBTI is a popular tool for determining personality preferences and helping teammates understand each other
- Four dimensions of MBTI include: **Reading Assignment 1**
 - **Extrovert/Introvert (E/I)**
 - **Sensation/Intuition (S/N)**
 - **Thinking/Feeling (T/F)**
 - **Judgment/Perception (J/P)**
- NTs or rational are attracted to technology fields
- IT people vary most from the general population in not being extroverted or sensing

Social Styles Profile

- People are perceived as behaving primarily in one of four zones, based on their assertiveness and responsiveness:
 - **Drivers**
 - **Expressives**
 - **Analyticals**
 - **Amiables**
- People on opposite corners (drivers and amiables, analyticals and expressives) may have difficulties getting along

Reading Assignment 2

**Thank
you**
